

75
years of innovation

- State-of-the-art regenerative energy recovery device
- Industry leading 90-95% sensible efficiency
- 75% + year-round latent efficiency
- Modulation & free-cooling controls
- Frost prevention not required for temperatures as low as $-40^{\circ}\text{C}/-40^{\circ}\text{F}$
- Available w/ optional 3A molecular sieve desiccant
- Compatible w/ variable air volume applications
- ASHRAE 62.1 compliant
